## PREFACE

This Mission Coverage Index (MCI) lists the intelligence targets imaged on the photography of this mission. Items in the MCI are arranged in three sections:

Section I provides short descriptions for newly identified targets and previously reported targets showing change, and also provides order of battle information.

Section II provides a listing of those targets which reflect no apparent change in facilities from the most adequate previous description. The MCI in which this description appears is designated by the appropriate mission number, prefixed by the letters "NAC" and appearing as the last entry on the photo reference line. Military installations where there is no significant change in facilities and where no order of battle can be determined are listed under this section.

Section III provides a listing of those targets which could be identified but not interpreted.

Targets in each of the three sections are arranged 1) by country, 2) within the country according to subject, 3) within the subject by WAC area, and 4) within the WAC area by geographic coordinates in ascending order. An explanation of column headings and photo references used in presenting the information is contained in the appendix. The map base used (when available) for the derivation of

coordinates in this MCI is the latest edition of the US Air Target Chart, Series 200.

For the convenience of the user, an index to all targets is included following Section III. Targets in the index are arranged alphabetically within a country.

Whenever photographic scale and quality of image resolution permit, aircraft are identified by their NATO names, i.e., FAGOT, BADGER, BEAR, etc. In cases where identification by type cannot be made, aircraft are reported according to the classification shown in the table below.

Classification	Wing Span (ft)			Helicopter Rotor Diameter (ft)
	Straight	Swept	Delta	
Small	0- 70	0- 40	0-35	0- 40
Light	71-110	41- 70	36-50	41- 60
Medium	111-150	71-130	51-70	61-100
Heavy	over 150	over 130	over 70	over 100

The user of this MCI is cautioned that the scan of photography was accomplished in a relatively short time and often without the aid of precise analytical and mensural techniques commonly employed in detailed photographic analysis. Consequently, although the information presented herein is essentially accurate, additional, detailed analysis may somewhat alter portions of the information.

### MISSION HIGHLIGHTS

Mission 1009, utilizing the KH-4 camera system, was accomplished during the period 6-13 August 1964 and provides ☐ operational passes over the Sino-Soviet bloc and the Congo.

Other activity newly identified on Mission 1009 includes:

25X1D

A total of 2,664 targets are reported in this MCI. Of this total, 101 targets are newly identified NPIC targets. These newly identified targets include: 8 ICBM launch areas, one fixed field MRBM launch site, 2 SAM support facilities, one SA-3 SAM site, 14 SA-2 SAM sites, 16 airfields (10 in the USSR, one in Hungary, one in China, and 4 in Poland), 12 electronics installations, one nuclear research institute, 17 military installations, 13 industries and basic services, 7 ammunition storage areas, and 9 unidentified installations.

Missile activity newly identified on Mission 1009 includes:

SAM				
SA-1	SA-2	SA-3	SA-0	Support
0	14	1	0	2
MRBM/IRBM				
Location		Launch Site Type		
Taurage		Fixed Field MRBM		
ICBM				
Location		Remarks		
Aleysk Probable Launch Area		single silo		
Dombarovskiy Launch Area A		single silo		
Dombarovskiy Launch Area B		single silo		
Dombarovskiy Launch Area C		single silo		
Kartaly Probable Launch Area B		single silo		
Kartaly Possible Launch Area C		single silo		
Olovyannaya Launch Group D		1 single silo		
Tyuratam Launch Pads G8 and G9		5 probable single silos launch pads		

### ELECTRONICS

Location	Type
Ostrov Vilkitskogo	early warning radar
Krasino	probable radar
Krasino	probable early warning radar
Yedinka	early warning radar
Elton	probable tracking
Banska Bystrica (CZ)	unidentified
Chita	Krug
Svobodnyy ICBM Complex	communications
Ila	HF communications
Komsomolsk	HF communications

Order of battle information of special interest includes:

### SUBMARINE

Location	Class	Firm	Probable	Possible
Guba Sayda	unidentified			6
Guba Litsa	unidentified			4
Severodvinsk	E-class SSGN			2

## SECTION II

THIS SECTION PROVIDES A LISTING OF THOSE TARGETS WHICH REFLECT NO APPARENT CHANGE IN FACILITIES FROM THE MOST ADEQUATE PREVIOUS DESCRIPTION. THE MCI IN WHICH THIS DESCRIPTION APPEARS IS DESIGNATED BY THE APPROPRIATE MISSION NUMBER, PREFIXED BY THE LETTERS "NAC" AND APPEARING AS THE LAST ENTRY ON THE PHOTO REFERENCE LINE. MILITARY INSTALLATIONS WHERE THERE IS NO SIGNIFICANT CHANGE IN FACILITIES AND WHERE NO ORDER OF BATTLE CAN BE DETERMINED ARE LISTED UNDER THIS SECTION.

## APPENDIX

## EXPLANATION OF COLUMN HEADINGS AND PHOTO REFERENCES

## COLUMN HEADINGS

Target--This column contains the name of the target. If the actual name is unknown, a name is assigned consisting of the name of the city or town closest to the target followed by a description of the target's function. Where appropriate, the target name is followed by a capsule description. Target numbers assigned by the Committee on Overhead Reconnaissance (COMOR), when available, are listed directly above the photo reference data.

Coordinates--Coordinates are referenced to the southwest corner of the minute square. When the target covers a wide area, coordinates are given for its approximate center.

WAC--This column provides the number for the World Aeronautical Chart covering the target area.

Target Numbers--This column is divided into two subcolumns. The first subcolumn lists, when known, the Bombing Encyclopedia (BE) number assigned to the target. The second subcolumn lists the target number assigned by NPIC. Target numbers, when used to reference an item, are prefixed by the WAC number of the chart on which the target appears.

## PHOTO REFERENCES

The photo reference line, or lines, provides the pass number, frame numbers, and best-frame grid (Universal Grid No 1, February 1964) coordinates for the target in question. In addition, conditions which affect the appearance of the target on photography are given. For example: ☐
